Mobile Reliability With Southern States Horizontal Circuit Switchers

Catastrophic events, weather related outages, and new construction affect everyone. Emergency or temporary service must be available, when and where you need it.

Critical applications demand peak equipment performance. Now is the time to ensure **the circuit switcher on your mobile substation** can provide maximum protection. Let Southern States provide a simple and affordable solution to **replace, refurbish, or upgrade** your existing mobile with our CSH or CSH-B Horizontal Circuit Switcher, and for any new mobile substation requirements make sure to specify the CSH or the CSH-B, the most capable circuit switchers available for mobile installations.

Key Advantages

- ❑ 20 kA Interrupting Capacity
- ❑ 5 or 6 Cycle Interrupting Time
- ❑ Circuit Making Within The Interrupter
- ❑ Custom-Designed Mountings
- ❑ Blade & Non-Blade Models Available
- ❑ Long-Term Support & Service
- ❑ Five Year Warranty

Available Ratings

- ❑ Design Voltages
38 kV - 242 kV
- ❑ Continuous Current
1200, 1600, & 2000 Amperes

Circuit Switchers furnished for mobile applications share the same design characteristics as our conventionally mounted units. Refer to Southern States Product Bulletin 803 for complete details.

Configurations are available for mounting on an independent trailer, or to coordinate with other components on a shared trailer.

Maximum Reliability Package

**CSH or CSH-B
Horizontal Circuit Switcher
&
CM-4AE
Motor Operator**
