LLS-II-2000 & LLS-II-3000 Load and Line Switchers

The Future Of Load Break Switches Is Here Now.

- Single gap puffer SF₆ interrupters deliver superior reliability
- Visual dielectric indication via a pressure gauge per phase provides personnel safety
- 2000 full load operations provide long life performance
- Can be furnished on virtually any manufacturers' vertical break switch rated 72.5 kV through 242 kV
- Can be furnished for installation on new vertical break switches or to retrofit existing vertical break switches

Applications

- Load breaking up to 3000 amperes
- Line dropping up to 300 amperes
- Loop splitting up to 3000 amperes
