Searching For A Solution?

Southern States After Sales & Service team specializes in custom solutions for existing installations.

Southern States provides replacement parts for all Southern States products; for Cole Electric Company, Siemens, Siemens-Allis, Allis Chalmers, and Schwager Wood Corporation switches, operators, and accessories; and for Siemens, Siemens-Allis and Westinghouse types CP, CPS, CPS-VB, and MFB circuit switchers.

Simple, cost-effective retrofits and upgrades are available for essentially any manufacturer's switches, operators, and accessories as well as for Siemens, Siemens-Allis, and Westinghouse types CP, CPS, CPS-VB, and MFB circuit switchers and Siemens, Siemens-Allis, and Westinghouse type V2-LB Line Switchers. Additionally, Southern States outdoor expulsion power fuses can have their live parts retrofitted in place of the live parts of existing outdoor expulsion power fuses of other manufacturers, providing multi-time fault interrupting power fuse holders, a significant total life cost savings versus the competitor's requirement for fuse holder replacement after each fault clearing operation.

Call today and discover the benefits a Southern States performance solution can provide.
