

PowerBox™

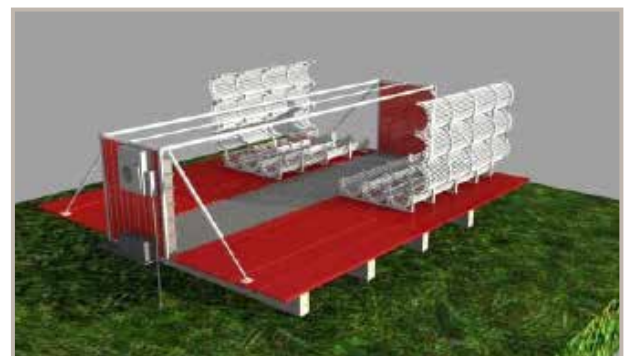

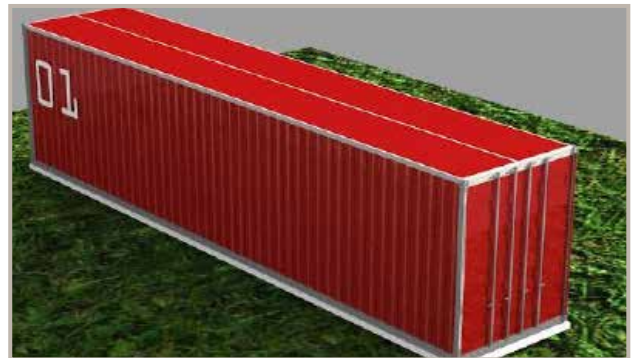

Long Term Storage For High Voltage Equipment.

PowerBox is a modified 40 ft or 20 ft storage unit designed specifically to house your equipment and supplies. Now instead of storing critical parts and equipment in wooden crates, PowerBox puts your gear in one place.

PowerBox can be configured to suit your specific needs or you can select from our standard designs. Units can be equipped with a 110V single phase electrical system, pre-wired for telephone and cellular hot spot. Units can also be outfitted with hydraulic and manual lifts to make accessing heavy equipment easy enough for a one or two person team. PowerBox can be designed with commercial-grade environmental control units for heating and cooling.

KEY FEATURES

- CorTen uni-body construction
- Three-way forklift pockets
- Full-width access doors on both or one side of container
- Available ballistic interior or exterior lining for adding protection
- ISO tested and CSC approved by Lloyds for use in the 20' module configuration
- Over 9.6 cubic meters (346 cubic feet) of internal capacity
- Easily repaired (essentially same construction as a 20" steel container)
- 1 Year Warranty on materials and workmanship
- Standard 36-inch wide personnel door installed on the side with lockable hardware
- Insulated to R13
- 5 Year Warranty on paint coatings
- Available in PrimoCoat Thermal coatings for reduced heat loading

Designed in cooperation with Pitbull Containers, inc.
