

# Service Division

Performance From A New Perspective

Do you have a need for skilled, trained installation, test, and maintenance assistance or help?

Have you spent too much time on equipment installation and adjustment?

Are your O&M crews overloaded? Are you having difficulty meeting construction budgets or installation schedules?

Southern States Service Division will provide you with qualified, factory trained engineers and technicians that will help you meet cost targets and time schedules and ensure that your switches and circuit switchers are installed, tested, upgraded, and maintained right the first time...**EVERYTIME!**

**Southern States offers a wide variety of services including, but not limited to:**

- Turnkey or factory supervised installation of substation equipment
- Equipment retrofits/replacements for disconnect switches, circuit switchers, power fuses, current transformers, and other substation equipment
- Equipment inspections and preventive maintenance of substation equipment
- 24/7 call support for all switch, circuit switcher, and other issues as well as guaranteed 10 hour response time in emergency situations
- Thermographic imaging, contact resistance measurements, circuit switcher testing, SF<sub>6</sub> gas leak detection, and other services for disconnect switches or SF<sub>6</sub> gas filled equipment

Give us a call and see how you can put to work our expertise gained from 90+ years of continual service experience in distribution, subtransmission, transmission, & EHV transmission substations to provide real, tangible benefits to you and your company.
